Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☒ no international search report has been established for the said claims Nos. 11

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

Re Item III.

Rule 6.2a of the PCT

Re Item V.

1 Reference is made to the following documents:

D1: FR 2 170 E (ERNEST ELIE DAVOT) 14 January 1904 (1904-01-14)

2 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):

A container comprising a hollow tubular outer body (e), closed at one end and open at the other, a platform (a) in the body gimbal mounted to remain horizontal irrespective of the orientation of the body.

From this, the subject-matter of independent claim 1 differs in that: a handle is secured to the body at its closed end.

2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

The problem to be solved by the present invention may be regarded as:

providing means for carrying the container in the inversed position, with the closed end up, so that anything in the platform is effectively in a closed container. To access the contents the container is inverted so that the open end of the container is uppermost, while the platform remains horizontal because of the gimbal mounting.

2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) because none of the prior state of the art discloses such a container.

3.0 Claims 2-10 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
